

Slider

Description :

The locksetting is in accordance with block 1. Other settings can also be specified. Furthermore, they are set automatically one after the other.

Parameters:

1. The cursor can be entered without a test.
 - If tests are memorised, an image file or personalised images can be selected from a specific image pool in one block.
2. If tests are not cached, the following parameters are available (in digital form):
 1. Two text boxes for one argument, one word and one word under the word.
 2. One image for the first piano
 3. Alternative test for page image
 4. One link
 1. Always visualised as a black button.
